

1st International Interdisciplinary Online Conference

THE TRAFFIC SOCIETY

Considering parameters for tomorrow's mobility

| 29 & 30 Μαΐου | <https://congress.driving.org.gr/> | congress@driving.org.gr

ANNOUNCEMENT - INVITATION

1st International Interdisciplinary Online Conference

"The Traffic Society"

Considering parameters for tomorrow's mobility

The **Hellenic Driving Instructors Association (H.D.I.A.)**, wishing to contribute to a safer, healthier and more humane, sustainable and fair urban environment and to defend the "right of the road" for all, continues its actions through events which aim to inform, educate and sensitize citizens on issues related to the urban transport organization and road safety and to activate the relevant state institutions.

Within this framework, and in collaboration with the **Technical Chamber of Greece (TCG)**, the **Sustainable Mobility Unit of National Technical University of Athens (SMU)**, the **Technical University of Crete (TUC)**, the **Hellenic Institute of Transport (HIT)**, the **Zografos Driving Academy (ZDrA)**, the **Scientific Association for the Promotion of Educational Innovation (EEPEK)** organizes the **1st Online International Interdisciplinary Conference on the Road Safety** titled: **"The Traffic Society; Considering parameters for tomorrow's mobility"**.

The conference will be held online, on May 29 and 30, 2020.

Conference objectives:

1. Evaluation of mobility and road safety in our country
2. Identification of existing problems and detection of possible future ones related to walking and vehicle circulation in Greece, in the light of ICT expansion.
3. Sharing negative and positive experiences from scientific studies, actions and practices in Greece and abroad.
4. Defining a Vision, objectives and policies proposals and measures related to mobility and road safety.
5. ICT exploitation and integration of relevant applications in everyday life and citizen training.
6. Support, Promotion and Sustainable Mobility Strategies evaluation.

The main thematic sections of the conference are the following:

1. Urban networks, urban planning and contemporary mobility.
2. Institutional Framework, Management, and Road Safety Policy.
3. Road/transport environment, infrastructure and users. Behavior, Interactions, Choices, Transportation Entities and Standards of the 'Sharing Economy'
4. Prediction, analysis and handling of traffic accidents.
5. New technologies and guidelines for safer vehicles, for the reduction of energy consumption and of the greenhouse gases production
6. Lifelong learning and vulnerable road user policies

"The road" remains the common ground for the interaction among vehicles, mobility, and people's behavior and training

1st International Interdisciplinary Online Conference

THE TRAFFIC SOCIETY

Considering parameters for tomorrow's mobility

| 29 & 30 Μαΐου | <https://congress.driving.org.gr/> | congress@driving.org.gr
